

# Estimated Pages for Django Marketplace System

This document provides an estimate of the required pages for building a Django-based Swappa-style marketplace platform. The system supports user account management, product listings, secure transactions, admin tools, and mobile app integration via APIs. Each section below outlines the key pages and features involved.

## Authentication & User Management

- Login Page
- Registration Page
- Email Verification Page
- Password Reset Request Page
- Password Reset Form Page

## User Dashboard & Profile

- User Dashboard Overview
- User Profile Page (View/Edit)
- Seller Verification Page (Upload ID)
- My Listings Page
- My Orders Page
- Messages (Buyer-Seller Chat)

## Product Listings

- Add New Listing Page
- Edit Listing Page
- Delete Confirmation Modal/Page
- Product Detail Page
- Listings by Category/Tag Page

## Search & Filtering

- Search Results Page
- Filtered Listings Page (with sort options)

## **Marketplace Transactions**

- Checkout Page (Stripe/PayPal integration)
- Order Summary/Confirmation Page
- Order Tracking Page
- Ratings & Reviews Submission Page

## **Admin Panel**

- Admin Dashboard Overview
- Manage Users Page
- Manage Products/Listings Page
- Sales Reports Page (Export CSV)
- Review Moderation Page
- Seller Verification/Ban Page

## **Frontend Pages**

- Homepage with Featured Listings
- About Page
- Contact Page
- FAQs / Help Center
- Terms of Service / Privacy Policy

## **Mobile API Support**

- API endpoints for all core features
- API documentation (Swagger/Postman UI)

## **Deployment & Maintenance**

- Deployment scripts and configurations (Docker, Unicorn, Nginx, SSL)
